Why Insight?

Throughout more than 2 decades of business growth, Insight obtained numerous certificates of merit and professional excellence, including:

| ISO-27001	ISO-22301	SOC-2	IASME
ISO 27001 ISO 27001 CERTIFIED	BUSINESS CONTINUITY MANAGEMENT DNV·GL ISO 22301	AICPA SOC aicpa.org/soc4so	CYBER ESSENTIALS CERTIFIED
Information Security Management	Business Continuity Management	Service Organization Control	Cyber Essentials Certified

Insight is accredited for providing "Professional Services in Cyber Security" by the Ministry of Transport, Communications and Information Technology.

Insight is also an active registered member with the following:

FIRST — FIRST is the global Forum of Incident Response and Security Teams, aiming to promote threat information sharing.

RCC — ITU - ARAB REGIONAL CYBERSECURITY CENTER — The ITU-ARCC was established with a vision of creating a safer cybersecurity environment in the Arab Region.

GFCE — The GFCE is a pragmatic, action-orientated platform for international collaboration in cyber capacity building.

CIS — CIS Partners leverage the CIS Benchmarks to automate configuration assessment and enhance cybersecurity posture.

Comprehensive Portfolio

Insight is committed to providing the highest level of service and expertise to enhance the security of your organization's IT systems and infrastructure, and we align our services along the most common requirements and cybersecurity frameworks.

A — Manage and Protect

Deploy risk-appropriate information security measures to protect the confidentiality, integrity & availability of your information assets.

B — Identify and Detect

Detect vulnerabilities, anomalies and potential cyber security threats before they cause significant damage to your information systems.

C — Respond and Recover

Continual monitoring of network and information systems to enable your incident response management program and business continuity measures.
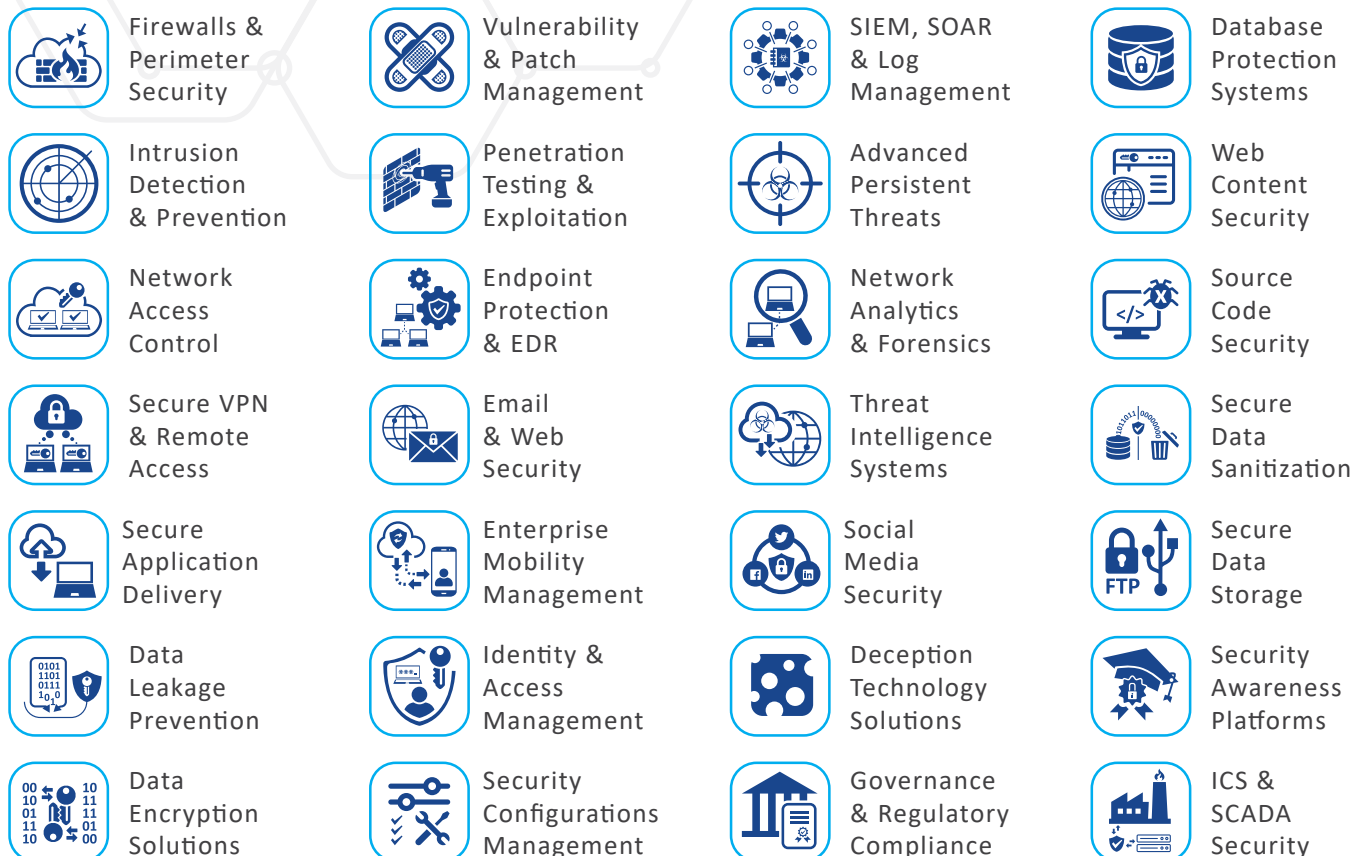

D — Govern and Assure

Align cybersecurity with your business objectives to ensure that your program is overseen by the top of the organisation and built into business decision.

We offer a wide range of cyber security solutions to cater for all your requirements. Our systems integration team is well prepared to deploy the solutions in your environment at a short notice.

Insight focuses on delivering services locally, in line with leading security guides on best practices, by highly competent resources and sound methodologies. We help our customers by deploying effective security controls to prevent attacks and enhance protection.

Potent Solutions

Firewalls & Perimeter Security	Vulnerability & Patch Management	SIEM, SOAR & Log Management	Database Protection Systems
Intrusion Detection & Prevention	Penetration Testing & Exploitation	Advanced Persistent Threats	Web Content Security
Network Access Control	Endpoint Protection & EDR	Network Analytics & Forensics	Source Code Security
Secure VPN & Remote Access	Email & Web Security	Threat Intelligence Systems	Secure Data Sanitization
Secure Application Delivery	Enterprise Mobility Management	Social Media Security	Secure Data Storage
Data Leakage Prevention	Identity & Access Management	Deception Technology Solutions	Security Awareness Platforms
Data Encryption Solutions	Security Configurations Management	Governance & Regulatory Compliance	ICS & SCADA Security

Practical Engineering Services

Security Technology Deployment	Network Security Architecture Review
Device Security Configuration Audits	Security Design and Hardening

Certified Engineers

Our team of engineers ensure that you will get all the help needed – and that all technology deployments are carried out as per industry standards.

Effective Support

Insight provides a comprehensive offering of support services to ensure the success of your business.

For the convenience of our customers, our services are available via several channels – and our engineers are reachable at any time.

Red Teaming Center

Insight brings the right adversarial thinking and technical abilities to help organizations shape their defensive posture to meet their compliance requirements faster and more effectively. We find flaws that could damage or endanger corporate network assets by emulating real-world threats and attack vectors to identify the weaknesses, demonstrate the impact before the attacker does, and propose strategic recommendations to fix those issues.

We provide a wide spectrum of professional services that cover all your security testing needs like:

Vulnerability Assessment	Penetration Testing
Red Team Drills & Emulations	Training & Cyber Ranges
Social Engineering Tests	Configuration Assessment
Secure Code Review	Architecture Review
Purple Teaming Exercises	Security Audits

Capable Red Team

The Insight red team members are well trained and certified for their respective roles by leading certification bodies.

How We Help ?

Corporate customers regularly attain specialized services from Insight to comply with regulations. We assist our customers to achieve their goals by performing the difficult, highly specialized, and time-consuming parts of their security testing requirements. Our red teaming services go beyond simple testing, and extend to purple and orange teaming activities.

What We Cover

We execute automated and manual assessments of your critical assets and infrastructure including:

Network Assets	Web Applications	Mobile Apps
Internet of Things (IoT)	Telecom Systems	Industrial Systems (ICS)

Our Standards

Insight follows the highest industry standards and best practices like:

OWASP	NIST	PCI-DSS	PTES	MITRE

Security Assessment Approach

SCOPING — ANALYSIS — MODELING — PREPARATION — EXECUTION — REPORTING — REMEDIATION

Security Operations Center

Insight's Security Operations Center was built with a vision to become the most advanced, best equipped, locally manned and standards compliant Security Operations Center in the country.

To achieve this, we aligned all our processes and procedures with leading standards and frameworks like NIST, ITIL, OWASP, PCI and others; and trained our analysts to match the same calibre.

Comprehensive Services

We have a great bundle of services and technology tools to match our customers' expectations and comply with their standards. Our SOC typically provides:

24 x 7 x 365 Monitoring	Alerts and Triage	Incident Response
Investigation & Analysis	Threat Hunting	Security Testing
Remediation Advisory	Security as a Service	Malware Analysis

Vulnerability Management	Deception Technology	Web & Mail Monitoring	Feeds & Threat Intelligence

Capable Blue Team

The Insight blue team members are well trained and certified for their respective roles and dealing with various technologies.

Competitive Benefits

|	
Comprehensive service	Competitive price point
Flexible contracts	Capable Professionals
Mature SOC Process	Complies with Regulations
Technology Agnostic	SIEM / SOAR Maturation
Add-on Services	Professional Services
Accessible Location	Simple Exit Strategy
